Summary

Full-stack developer with hands-on experience building end-to-end web applications using React, Node.js, Express, and MongoDB. Experienced in designing REST APIs, implementing JWT-based authentication, and integrating frontend and backend systems. Actively participates in hackathons and open-source contributions, with a focus on writing clear, maintainable code and strengthening core computer science fundamentals.

Education

RNS INSTITUTE OF TECHNOLOGY B.Tech in Information Science and Engineering (CGPA: 8.7 / 10.00)	2023-2027 Bengaluru, Karnataka
B.G.S. PU College Pre-University Course-PCMB (Marks: 95%)	2021-2023 Bengaluru, Karnataka

Projects

SpamShield - AI Spam Detection System [Live Demo](#)
React.js, Python, Flask, RoBERTa model, Hugging Face

- Built full-stack web app using React/Flask/MongoDB with RoBERTa ML model achieving **99.8%** spam detection accuracy
- Implemented intelligent risk scoring and content-aware explanations for phishing, scams, and malware detection
- Developed responsive UI with real-time analysis, message history, and cybersecurity news integration
- Deployed scalable backend with secure API endpoints and comprehensive error handling

Krishi Sakhi - AI-Powered Farming Assistant [Live Demo](#)
Next.js 15, Tailwind CSS, Google Gemini AI, OpenWeather API

- Developed a full-stack farming assistant web application using Next.js 15 and TypeScript, delivering AI-driven crop recommendations and agricultural insights to Indian farmers.
- Integrated Google Gemini AI agent (gemini-2.5-flash) to analyze soil conditions, crop types, and environmental data for personalized farming advice and predictive agricultural planning.
- Implemented OpenWeather API agent for real-time weather data retrieval and location-based forecasts to support informed decision-making.
- Developed market data agent to fetch and display current agricultural commodity prices and market trends for better farm management.
- Deployed on Vercel with optimized build configurations for reliable, scalable performance.

Technical Skills

Languages: JavaScript, C, Python

Frameworks: React.js, Next.js, Express.js, Node.js, Flask

Machine Learning/AI: Hugging Face Transformers, Google Gemini AI

Databases: MongoDB, MySQL

Tools: Git, GitHub, Vercel, Render, Firebase, Supabase

Coursework: Data Structures, Algorithms, Operating Systems, Computer Networking

Achievements

- Finalist at **Build for Billions: Indiastack National Software Hackathon** and **Autonomous Hacks AI Hackathon** (GDG Gandhinagar), contributing as a full-stack developer to shortlisted project solutions.
- **Hacktoberfest Super Contributor**, with multiple accepted pull requests to open-source repositories.

Certifications

- NPTEL Fundamentals of Artificial Intelligence
- NPTEL Software Engineering and Project Management
